

# Valimet, Inc.

*Our commitment to quality ensures that you get the product you need on time, every time.*

## Packaging Policy

We strive to provide our customers with superior quality product at a competitive price. Valimet packs its metal powders in steel containers that inhibit static and moisture problems. These containers range in size from one quart cans to 55 gallon drums.

While steel prices remain high, we have reduced our previous packaging surcharge in an effort to lessen the burden on our customers in these difficult economic times. Please note that the small container prices include pre-existing labor charges as well. Packaging charges for various size containers (two containers or more per shipment) are shown below (based on maximum packing per container):

Quart Can:	\$1.65 per pound	(One pound with liner)
1 Gallon Can:	\$1.65 per pound	(Up to 10 pounds)
2-½ Gallon Pail:	\$0.85 per pound	(Up to 25 pounds)
5-Gallon Pail:	\$0.40 per pound	(Up to 50 pounds)
30-Gallon Drum:	\$0.10 per pound	(Up to 400 pounds)
55-Gallon Drum:	\$0.08 per pound	(Up to 600 pounds)
Recon. 55 Gallon Drum w/liner:	No additional charge (Up to 600 pounds)	

We also offer packaging in conductive bulk bags (up to 3,000 pounds) at no additional charge.

Note: When conductive liners are requested in new container, there is an additional liner charge of \$5.00 each for small liners (2 ½ to 5 gallon) and \$15.00 each for large liners (30 to 55 gallon).

Thank you for your cooperation and understanding. We welcome your comments so that we may better serve you.
